

Nice Rack®

The Expandable Equipment Rack – SURF

Unpack and check to make sure that the following items are included:

- Two (2) Wall Mounts
- Four (4) Wall Mount End Caps (2 top, 2 bottom)
- Two (2) Equipment Support Arms
- Four (4) 2½" Mounting Screws

Tools needed for installation

- Drill
- 3/32" drill bit
- Phillips screw bit
- Tape Measure
- Level
- Stud finder (optional)

Wall Mount Installation

1. Select a location on your wall that provides adequate space for your sports equipment to rest on the rack.
2. Locate two wall studs to which you will attach each Wall Mount and mark their location. (Since wall studs are typically 16 inches apart, the optimal distance between Wall Mounts will probably be 32 or 48 inches apart.)
3. Using a level, hold each mount (as shown in Figure 1) at the desired height and mark the screw location with a pencil. (A level is recommended to ensure that the Wall Mount is aligned with the stud and is important for multiple Nice Rack installations).
4. Remove Wall Mount and drill 3/32" pilot hole for each of the 4 screw locations.
5. Secure Wall Mounts using the four 2½" screws provided.

Support Arm Installation

1. Carefully center each Equipment Support Arm into the Wall Mount and press down to lock arm in place (as shown in Figure 2). Make sure the bottom tongue on Support Arm fits snugly in Wall Mount.
2. If only installing one Nice Rack, slide top (male) and bottom (female) end caps into position to complete installation (as shown in Figure 3). (For multiple Nice Rack installations, do not install end caps until all racks are installed.)

Multiple Nice Racks Installations

1. For multiple Nice Rack installations, connect additional Wall Mount to the top or bottom of the already installed system, mark screw location and repeat steps 4 through 5.
